

LOCAL AREA

Check vertical limits of airspace when climbing and descending

Low Level Route (LLR) - If transiting through or across, be careful with your altitude - max 1300ft, Manchester QNH

Watch the boundary! Ensure you descend in good time well before entering the LLR

Caution the higher ground but watch the airspace above. Check your altitude

Check airspace above Always be aware of what is above you

Check your max altitude when departing Barton, be sure not to climb too fast into the airspace above

Be careful when passing close to the boundary that you do not stray over - leave plenty of space
